

A3 Assignment

Prolog Logic Puzzle - Costume Party

Four couples in all

Attended a costume ball.

The lady dressed as a cat

Arrived with her husband Matt.

Just two couples were already there,

One man dressed like a bear.

First to arrive wasn't Vince,

But he got there before the Prince.

The witch (not Sue) is married to Chuck,

Who was dressed as Donald Duck.

Mary came in after Lou,

Both were there before Sue.

The Piratess arrived before Ann,

Neither is wed to Batman.

If Snow White arrived after Tess,

Then how was each couple dressed?

Instructions:

- Use Prolog to find the solution to this puzzle.
- Submit a screenshot of your Swish editor with the knowledge base and result when you run the query.

Note:

- It's important to start with a representation of the answer - that basically defines all your variables.
- Then give Prolog all the options for possible values to the variables
- Then encode the "clues."

Use of Generative AI to solve this problem will result in an academic integrity violation. Follow the basic syntax and instructions as presented in class.
